PROFESSIONAL SUMMARY

Motivated Computer Science (AI & ML) undergraduate with strong skills in Full Stack Development, Cloud Computing, and problem solving. Experienced in building responsive, full-stack web applications and researching machine learning through academic projects and an AWS Cloud Computing internship. Passionate about learning new technologies and building innovative, user-focused software solutions.

SKILLS

- **Programming Languages:** C, Java, Python
- **Web Technologies:** HTML, CSS, JavaScript, Bootstrap, React.js
- **Database:** MySQL, MongoDB, SQLite
- **Cloud:** AWS (EC2, S3, IAM)
- **Tools:** Git, GitHub, VS Code, Postman

EDUCATION

GMR Institute of Technology, Rajam, Andhra Pradesh 2023 – 2027
B.Tech CSE - AIML CGPA: 7.2

Narayana Junior College, Andhra Pradesh 2021 – 2023
Intermediate (MPC) 66.3%

Sree Vignan School, Chodavaram 2019 – 2020
Secondary School (SSC) 93%

INTERNSHIP

SDE Intern — HPS (OPC) Pvt. Ltd., Visakhapatnam Jun 2026 – Present

- Developing and enhancing scalable software applications using modern software engineering practices.
- Contributing to application development, debugging, testing, and performance improvement.
- Applying software design and development fundamentals to build reliable and maintainable solutions.
- Collaborating with engineering teams to analyze requirements, resolve technical issues, and deliver efficient software solutions.
- Working with development tools, version control, APIs, databases, and software development workflows.

AWS Cloud Computing Intern — Hashtag Solutions, Visakhapatnam Jun 2025 – Jul 2025

- Deployed and managed web applications using AWS EC2 and Amazon S3.
- Configured IAM users, roles, and security policies following least-privilege principles.
- Worked on cloud deployment, monitoring, and troubleshooting for hosted applications.

PROJECTS

National Disaster Management System

- Developed a responsive disaster management web application for emergency alerts and citizen safety, with real-time alerts across progressive risk levels (Low, Medium, High).
- Designed a traffic-aware safe route planning interface with nearby shelter information and offline support.
- Built an accessible, WCAG 2.1 AA compliant UI with semantic HTML, ARIA labels, and keyboard navigation.

Salon Booking System

- Developed a full-stack salon booking web app using React.js on the frontend and a Node.js/Express.js REST API backend, with SQLite for persistent storage of users, bookings, and payments.
- Implemented OTP-based authentication with email verification and secure password reset using Nodemailer, plus an admin analytics dashboard for revenue and user activity.
- Integrated premium features including AI Virtual Makeover, Loyalty Rewards, Digital Gift Cards, and Specialist Selection with a responsive Tailwind CSS UI.

RESEARCH PAPER

Driver Drowsiness Detection using Machine Learning 14-11-2025

- Authored and submitted a research paper on real-time driver drowsiness detection using EAR-based eye-closure detection and CNN-based facial landmark tracking.
- Proposed a lightweight alert-system architecture flagging fatigue indicators to advance AI-driven road-safety research.

ACHIEVEMENTS

- Selected as a District-Level Volleyball Player, Andhra Pradesh.
- Participated in 3 Hackathons, building rapid prototypes under tight deadlines.
- Recognized for designing unique, creative UI/UX across personal projects.

CERTIFICATIONS

- Full Stack Web Development – L&T EduTech
- Python Programming – HackerRank
- Machine Learning – Infosys Springboard
- Front-End – HP LIFE
